Dear Sir/Madam,

This letter is to express my keen interest in the Software Engineer position you have advertised on your website. With a degree in Web Technologies, HND in Computing, and other related education such as ND in Computing, as well as over 5 years of commercial experience, I believe I would be a good candidate for the advertised position.

I am ambitious, inquisitive, and invigorated by progress. I make a conscious effort to be at the forefront of emerging technologies. Some of the requirements you listed closely match my experience, such as:

- Full-stack Microsoft development (SQL, ASP.NET C# MVC, and frontend technologies),
- Strong communication skills,
- Experience in collaborative, deployment, and source control tools,
- Agile Development Methodologies, and
- Experience in large and complex applications.

In addition to these, I offer experiences that are closely related to development environments, such as:

- Good design and development documentation skills,
- Keen UI and front-end design skills. In my spare time I have designed and delivered portfolio books and photo books, which I can easily translate into web UI design, and
- Experience in web interfaces for non-public-facing applications.

Having worked for Proagrica for over 2 years, I am already familiar with most of the products you offer and have worked in close collaboration with most development teams. I am technically knowledgeable about the product you offer and understand customers' expectations. I am a fast learner of new projects and technologies and adapt to a new environment quickly. I am confident the skills and experience I gained at your organisation have prepared me for the challenges this new opportunity brings.

I have attached my resume for further consideration. I would like to thank you for taking the time to consider my application. I look forward to hearing from you.

Sincerely,

Aseged T Woldeselassie.
